Main objectives/Findings of the webinar:

It has to be studied and analysed to understand its deep significance not only for the cause of our independence and our country but also for the cause of the world and the whole of humanity in the context of the problems and challenges of our age.

And the way Gandhiji reached out to the people from all sections of the society particularly the ordinary men and women and the underprivileged and downtrodden among them and sought their support for the great March.
