# Two best practices successfully implemented by the Institution

## 1) Title: Signing MoU with Various Government and NGO agencies

#### **Objectives of the Practice**

- (i) The institutions partnered with NGOs to cater to the co-curricular activities of the students
- (ii) The institution signed MoU with some Government departments to organise trainings as well as leasing of land for students activities.
- (iii) The institution partnered with nearby Hospital for medical centre for students and teachers

#### The Context:

Since the institution has limited space and facilities for the all-round development of the students, it resolves to partner with NGos and Government departments by signing MoUs.

## The practice:

- (i) The IQAC signed MoU with Sports Council of Mizoram. With this MoU, the institution is permitted to use the playground of The Sports council of Mizoram as and when needed.
- (ii) MoU with SIRD: SIRD has already organised a successful training on Sustainable skill development programme for the final year students. The Refreshments for participants and honorarium for resource persons were all born by the department.
- (iii) MoU with DIET: The NCC cadets need space for drilling and practice. Therefore, MoU is signed with DIET whose land is next to the college. The Diet management has lent their Basket Ball area to be used for drilling, fall-in and for other NCC activities.
- (iv) MoU with Electric Veng YMA and Ramhlun North YMA: MOUs have been signed with these two NGOs which enable the college to use their auditorium and sports complex during College week every year.
- (v) MoU with Nazareth Hospital: another MoU has been signed with our neighbour hospital namely Nazareth Hospital. The hospital serves as a medical centre for the institution, availed by the students and the teachers when the need arise.

#### **Evidence of success:**

The success of the actions taken by the institution is evident as all the outside and co-curricular activities of the institutions including, Sports, trainings, NCC activities etc; are being accomplished and performed successfully throughout the year by engaging these various Government and Non-Government agencies through MoUs.

## **Problem encountered:**

Regarding the sports arena and facilities, since these spaces do not belong to the institutions, the institutions need to adjust and squeeze in to the availability and convenience of the management and authorities.

### 2) Title: Lailak taken up as Adopted Village

# **Objectives of the Practice:**

Lailak, a village within the state is adopted by the college, the students made trips to the village working for the upliftment of the people. The objective is to cater to the needs of the place in all possible ways within the means available in the institution.

#### The Context:

Lailak Village is taken up as adopted village by the institution through NSS unit. It is a village 90 kilometres away from the city. About 900 people are living there and 120 houses are there.

#### The practice:

The institution hosted three work camps in the village, did survey of the village and organized awareness campaign on Covid 19 vaccination. The works carried out in the village are:

- (i) Two public toilets are constructed in the village.
- (ii) The Village Chief family tombstone which was in danger of perishing due to construction of roads is preserved by erecting retaining wall.
- (iii) Renovation of the public water point.

#### **Evidence of success:**

Lailak village now enjoy clean and well established water point, public toilets provide convenience and cleanliness within the place. A historical place is preserved that adds to its historical importance.

#### **Problem encountered:**

- 1. There are yet many projects and further works to be done for the progress and development of the village but due to insufficient funds at this point of time, these projects could not be accomplished as and when desired.
- 2. Distance is another problem encountered as the distance between Aizawl and Lailak is 90 kms which makes it difficult for frequent visits to the site.
