

Visiting Programme of Adopted School 11th April, 2023

As an integral component of the Institutional Quality Assurance Cell (IQAC) initiative, a select group of seven core students, each representing their respective departments, has been chosen to form a dedicated team tasked with providing educational assistance to the Sihhmui adopted school on the 11th of April. This endeavor, orchestrated by the college, underscores the commitment to community engagement and educational support.

In a benevolent gesture on behalf of the college, the school received a thoughtful gift consisting of five water filters and a generous donation of 10 kilograms of chicken intended for their midday meal program. This act not only demonstrates the college's dedication to social responsibility but also aims to enhance the overall well-being of the school community.

The visiting team, led by the Coordinator and Assistant Coordinators of IQAC, embarked on this meaningful mission today. Their objective is not only to impart knowledge and educational assistance but also to foster a symbiotic relationship between the college and the adopted school.

The impact of this collaborative effort extends beyond the boundaries of the school and resonates positively with both the core students involved and the wider community. By creating an environment of shared learning and support, everyone involved—school students, core students, and the entire community—stands to benefit significantly, reinforcing the value of such initiatives in promoting holistic educational development and community welfare.
