

Systematic Voters' Education and Electoral Participation Exhibition 31st August 2023

The Election Cell at Aizawl DC orchestrated a meticulously planned sensitization and awareness program, aligning with the Systematic Voter's Education and Electoral Participation initiative mandated by the Election Commission of India. This significant undertaking unfolded at the Assembly Secretariat, drawing the participation of 17 students from the esteemed Department of Political Science.

The program, meticulously designed to promote voter literacy, served as a platform to impart crucial knowledge regarding the rights and responsibilities of voters in the Democratic Republic of India. Through insightful presentations and interactive sessions, the attendees gained a comprehensive understanding of the electoral process, contributing to their civic education.

Recognizing the importance of student involvement, the Election Cell ensured that the participating students not only received valuable knowledge but were also provided with a conducive environment for learning. A thoughtful provision of hearty refreshments and a traveling allowance for the students underscored the commitment to fostering an engaging and rewarding experience.

The impact of the program extended beyond the immediate educational context, as the students emerged equipped with a heightened awareness of election procedures and voter literacy. This newfound knowledge not only enriches their academic pursuits but also empowers them to actively participate in the democratic process, thereby contributing to the civic engagement of the youth.

In essence, the students were the primary beneficiaries of this well-organized initiative, gaining both knowledge and practical insights that are integral to their roles as responsible and informed citizens of the democratic framework. The Election Cell's commitment to promoting civic

awareness through such programs underscores the collaborative effort to build an informed and engaged electorate.
