

Waste Management webinar on May 9, 2023.

- **Resource Person: Dr. H. Laldinmawia**, Assistant Professor, Department of Geography, GANC
- **Audience:** Over **200 students** participated in the webinar.

The webinar aimed to foster awareness about sustainable waste management, emphasizing the benefits of waste reduction and circular economy practices. Circular economy involves redesigning, recovering, and reusing products and materials to minimize environmental impact. It strives to eliminate inefficient resource utilization and reduce waste in the market.

Key Learning Objectives for Participants:

1. Understand the **significance of waste management** for sustainability.
2. Recognize the consequences of **ineffective waste management planning and practices**.
3. Appreciate the **individual contributions** to waste management.
4. Explore **strategies and plans** for sustainable waste management.
5. Consider the **role of digitization** in waste management.

The webinar provided valuable insights into addressing one of the most critical environmental challenges faced by cities worldwide: **solid waste management**. As urban populations grow and economies expand, managing municipal solid waste becomes increasingly crucial. Additionally, proper disposal of hazardous waste, such as medical waste from hospitals, is essential to prevent pollution and health risks.
